

Eagle Star Minerals appoints new Chief Operating Officer and a Project Manager for Ruth Phosphate Project

June 30, 2011, Vancouver, British Columbia: Eagle Star Minerals Corp. (TSX VENTURE:EGE; PINK SHEETS:ELGSF; FRANKFURT:E6R; "Eagle Star" or "the Company") – is pleased to announce the appointment of Jose Carlos Polonia (currently senior advisor to the Company's Advisory Board) as its new Chief Operating Officer, and the addition of Carlos Augusto Sena de Sá as Project Manager for the newly-acquired Ruth Phosphate Project, in the state of Piauí, Brazil.

Jose Carlos Polonia

With nearly 40 years of Brazilian geological experience, Mr. Polonia brings his extensive knowledge and expertise in developing various mining projects through multiple stages to his new role as Chief Operating Officer of Eagle Star. Mr. Polonia began his career with a solid 30 year tenure for Brazilian mining giant Companhia Vale do Rio Doce (also known as CVRD or "Vale"), beginning as a Geologist in Vale's Iron Ore Development Department - Itabira, Minas Gerais State in 1972. He then moved on to serve Vale in various management roles, including coordinator of a group that studied, evaluated and devised methods to extract gold from iron deposits.

With the first half of his career devoted to research and studies, Mr. Polonia's second half was focused on hands-on management of mining operations. This included overseeing the construction of gold concentration plant (and facilities) and later on becoming Mining Manager of the Department of Gold Production of the company's Caeté project, MG. While performing the latter assignment, Mr. Polonia oversaw costs and performance relating to the production of 300,000 tons/year of ROM and 700kg/gold. Mr. Polonia concluded his time with Vale as a Senior Geologist of the Acquisition Department before moving on to help educate the next generation of geologists. Since moving on from Vale, Mr. Polonia has served as a consultant for multiple large mining companies including evaluating iron ore projects for mining giant BHP Billiton and an advisory role for Nippon Steel.

"It was a natural decision for us to appoint Mr. Polonia as Chief Operating Officer," commented Eran Friedlander, President and CEO of Eagle Star Minerals Corp.. "His contribution to the company and its strategy since joining us on March as senior technical advisor could not be overstated. A prominent, knowledgeable and highly experienced geologist, Mr. Polonia has proven to be a real asset to the company. Going forward, we are confident that the fruits of his labor will become evident for everyone to see and will deliver significant value to our shareholders.."

Carlos Augusto Sena de Sá

With 30 years of diverse Brazilian geological experience, Carlos Augusto Sena de Sá brings to Eagle Star a specialized knowledge pertaining to locating and developing agromineral deposits. Mr. Sena de Sá's geological features roles aligned with mining giants such as CVRD (or "Vale"), BHP Billiton, Rio Tinto, Anglo American, DuPont and Kinross, as well as Brazauro Resources Corp. (Jaguar Resources), Talon Metals Corp. and Paranapanema Group, TVX/CNM (merged by Kinross), among others. Throughout his professional career, Mr. Sena de Sá has been involved in all levels of project development, from research and assessment of projects to actual mining.

On top of acquiring specific expertise in minerals used for agricultural development, Mr. Sena de Sá's expertise expands further than agrominerals, including exploration of base metals, titanium and gold. From 1995 to 1998, his work led to the discovery of a gold deposit at Volta Grande do Xingu, Pará, with resources of 1.7Moz Au (currently controlled by Verena Minerals). In later years, his advisory guidance led to discovery of phosphorous bauxite and limestone deposits in São Luís and to discovery of titanium, gold and tin deposits on the coasts of Pará, Maranhão, and Tapajós (PA). Most recently in 2010, Mr. Sena de Sá advised

Elabore Consultoria S/S in investigating potential targets for agromineral deposits in the Southeastern and Central Western regions of Brazil. The activity indicated four deposits of hundreds of million of tonnes of rocks suitable for this activity.

"Mr. Sena de Sá, has all the necessary credentials to assist our company as we embark on developing our newest acquisition: the Ruth Phosphate Project," commented Eran Friedlander, President and CEO of Eagle Star Minerals. "His valuable expertise pertaining to agrominerals and guidance on our new project is a welcome addition to Eagle Star's strategy going forward."

The appointment of Mr. Polonia as Chief Operating Officer, as well as Mr. Sena de Sá as Project Manager for the Ruth Phosphate Project is effective immediately. Eagle Star's new additions to the management team are being implemented to further aid the development and progress of both of the Company's key Brazilian mineral operations; namely the newly-acquired Ruth Phosphate Project and high-potential Angico Iron Ore Project, as well to as to seek and acquire new high-potential projects within Brazil.

At this time, Eagle Star has made no other organizational or structure changes in conjunction with this announcement.
